PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years of experience across the PHP/Laravel, Go, and React/Next.js ecosystem, promoted from Software Engineer to Senior Software Engineer at Suitmedia in recognition of technical contribution and consistent delivery. Comfortable owning the full development lifecycle from database design and REST API architecture to third party integrations and application security hardening while collaborating closely with designers and QA within an Agile workflow. Known as a detail oriented, communicative problem solver with a strong drive for continuous learning, and a track record of driving complex features to completion both independently and as part of a team.

TECHNICAL SKILLS

- Languages: PHP, JavaScript/TypeScript, Go (Golang)
- Backend & APIs: Laravel, Node.js, Go (Gin, GORM), RESTful API design
- Frontend: React.js, Next.js, Tailwind CSS
- Mobile: Flutter
- Databases & Caching: MySQL, MongoDB, Redis
- Infrastructure & Tools: Nginx, Linux (Ubuntu), Cloudflare R2, Git, Agile/Scrum
- Other: WordPress/Elementor, Figma (UI/UX)

WORK EXPERIENCE

Software Engineer → Senior Software Engineer *Jun 2022 - Jan 2026*

- Promoted from Software Engineer to Senior Software Engineer based on technical performance and delivery consistency.
- Designed, implemented, and optimized RESTful APIs to support enterprise grade web applications and system integrations.
- Designed and maintained database schemas with a focus on data consistency, scalability, and long term performance.
- Integrated third party APIs and real time communication features (WebSockets) to support core product functionality.
- Implemented security hardening measures, including input sanitization and protection against common vulnerabilities such as SQL injection.
- Managed server infrastructure and SSL configuration across staging environments to ensure application reliability.
- Collaborated closely with designers and QA to deliver reliable, user friendly applications, participating actively in code reviews, sprint planning, and Agile ceremonies.
- Led development efforts within the team, guiding technical decisions and mentoring on backend architecture and API standards.

Freelance Full-Stack Developer *Apr 2021 - Feb 2024*

- Delivered end to end full-stack web applications for 4 clients, owning database design through frontend implementation
- Advised clients on technical architecture and translated business requirements into scalable solutions.

Full-Stack Web Developer *Jul 2018 - Jun 2022*

- Built and maintained Laravel based web applications for clients, handling both backend and frontend development.

- Partnered directly with clients to analyze requirements and propose technical solutions, supporting long term system maintenance and upgrades.

INDEPENDENT PROJECTS

- **Availra** - SaaS booking platform for Indonesian service providers (photographers, barbershops, tutors); founder & lead developer, built public booking pages and tiered subscriptions.
- **SolunaBit** - Web agency serving local SMBs in Kendal; delivered SEO optimized sites with local business schema and landing pages.
